# MEKÂN INTERIORS

Window measuring sheet · print me, stick me to the fridge, measure twice

## THE RULES

- Use a steel tape and measure in millimetres. Fabric tapes stretch and lie.
- Send exact sizes. Do not deduct anything - clearances are our job, not yours.
- Curtains: width is your track length (or wall to wall). Drop is top of track straight down to the floor.
- Track sits 100-150 mm above the frame; extend 150-200 mm past each side of the window.
- Recess blinds: width in three places, give the narrowest. Drop left/centre/right, give the longest.
- Measure every window twice. Two passes disagree? A third settles it.

## YOUR WINDOWS

| Room / window | Width (mm) | Drop (mm) | Mount (wall/ceiling) | Pass 1 | Pass 2 |
|---|---|---|---|---|---|
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |

**Measured wrong anyway? We remake it.**
You pay for the new fabric and manufacture only, never the full price twice. That is the written policy.
